1.0 System Overview

The Global Command and Control System (GCCS), Version 2.2 HP Operating System (OS) provides an environment to share data via a local or wide area network and operates in conjunction with multiple applications on the same hardware platform.

2.0 Version Description

The following subsections describe the Global Command and Control System, Version 2.2 HP OS:

2.1 Inventory of Materials Released

The following physical media and associated documentation make up the Global Command and Control System, Version 2.2 HP OS:

- HP Bootable Operating System for GCCS 2.2 (Version 2.3.0.2) tape.
- HP Operating System GCCS 2.2 Upgrade segment (Version 2.3.0.2) tape.
- *Version Description Document (VDD) for the Global Command and Control System, Version 2.2 HP Operating System, Version 2.3.0.2.*

2.2 Software Changes

The following changes were made to the versions described:

1. Integrated various HP OS patches into new HP OS. Fixes include critical memory leak patch and enabling of nsswitch.conf file.
2. Upgraded SysAdm and SecAdm account groups to Version 2.2.0.5 for GCCS 2.2 (baseline of UB 3.0.1.6G). See *Unified Build 3.0.1.6G Version Description Document* for specific modifications to SysAdm and SecAdm.
3. Produced a non-destructive segment that will upgrade an existing GCCS 2.1 HP OS to the 2.3.0.2 OS for GCCS 2.2. See *GCCS 2.2 HP Operating System Upgrade Load Instructions* for guidance on installation.

3.0 Installation Instructions

For instructions on loading the GCCS 2.2 HP Operating System, see the *GCCS 2.2 HP Operating System Upgrade Load Instructions* (operating system upgrade segment) or the *GCCS 2.2 HP Operating System and Unified Build 3.0.1.6G Application Installation Instructions* (bootable operating system).
